

CICAL

Sugar silos of Le Boulou

The use of railway/road modal shift
for sugar transport to Spain

© Jacques Martinez

Subsidiary of SOGELIA (SENALIA + SHGT) and ECORAIL – established in 1993

CICAL owns 4 silos near the Spanish border in eastern Pyrenees. They are conceived for sugar transport to Spain, mainly to the region of Barcelona.

- 2 tower silos of 2,300 tonnes and 2 silos of 1,800 tonnes each
- Analytical laboratory and automatic sample taking
- Shipments in bulk (tanks) or packed in big bags
- Unloading silos with the FIFO method
- Delivery times shortened to minimum (2 hours from Barcelona)
- Certification FSSC 22000

Adapted to just in time deliveries

The use of railway/road modal shift.

The silos are supplied by complete trains of 1,200 tonnes, the deliveries are made by road.

The consignees are food manufacturers (drinks, pastries, chocolate, dairy products, confectionery ...).

CICAL uses tanks which are exclusively dedicated to food products transport and wagons which are only meant for the transport of sugar.

150,000 t
of sugar
handled a year
